BRACKETS

I METAL MINI BRACKETS

Stainless Steel Mini Brackets, made by a metal injection process, guarantee high quality and functionality on Orthodontics procedures.

The Metal Brackets present a low profile design, smooth edges and hooks that grant less friction and greater comfort. They also are smaller than traditional brackets enabling an improved aesthetics and a soothed experience.

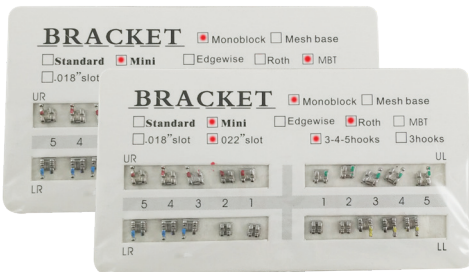

The brackets are colour coded for an easier usage by the dentist.

Kit 5-5 Upper / Lower | Hooks 3, 4 and 5 | Plastic Box or Cardboard Package

PRESCRIPTION

Roth .022" Slot	BRMEROTH22001
MBT .022" Slot	BRMEMBT22002-1

Plastic Box

PRESCRIPTION

Roth .022" Slot	BRMEROTH22002
MBT .022" Slot	BRMEMBT22002

Cardboard Package

I SELF LIGATING BRACKETS

Self Ligating Brackets reduce the friction between the wires and metal doors speeding up the first stage of orthodontics - alignment.

The brackets present a simple locking mechanism that allows a secure, easy and quick opening or closing, reducing the procedure time. The Self Ligating brackets also enable a more aesthetical look and comfortable experience.

Kit 5-5 Upper / Lower | Hooks 3, 4 and 5 | Plastic Box

PRESCRIPTION

Roth .022" Slot	BRMEROTH22SL001
MBT .022" Slot	BRMEMBT22SL001

I LINGUAL BRACKETS

Lingual Brackets are placed on the inside of the teeth providing an aesthetical solution without compromising the treatment quality.

The Brackets have a low profile design and smooth edges to prevent any irritation of the tongue and patient discomfort.

Kit 5-5 Upper / Lower | Silver Series | Plastic Box

PRESCRIPTION

.018" Slot	BRMEROTH18LINGUAL

I NITI ARCHWIRES

Highly flexible NiTi Archwires for a light and continuous force. Made of high quality Nickel Titanium the arches are resistant to deformation and have a polished surface for friction reduction.

These Archwires enable fewer wire changes and longer intervals between appointments, for example on early stages of the orthodontic treatment.

Archwires packed and sealed in 10 units. May be autoclaved for additional protection.
Shape: Ovoid | Quantity: 10 Units

I REVERSE CURVE ARCHWIRES

The Reverse Curve Archwires, made of superelastic NiTi, ensure the application of light and continuous forces, without deformation.

These are the most indicated Archwires to open or close the patient's bite, retract flared or protruding incisors, and prevent unwanted tooth movement while preserving the arch form.

Archwires packed and sealed in 2 units. May be autoclaved for additional protection.
Shape: Ovoid | Quantity: 2 Units

I AESTHETIC ARCHWIRES

The Aesthetic NiTi Archwires, with a colour coat similar to the natural teeth, will provide an optimum cosmetic appearance.

The Archwires are covered with a synthetic low friction coat which ensures a great sliding surface for brackets. The coating is resistant to distortion, to stains and cracks maintaining its colour for a longer time.

The combined use of the Aesthetic Archwires with composite or ceramic brackets will provide a natural look for orthodontic retainer.

All archwires are individually packed and sealed, and may be autoclaved for additional protection.

I THERMAL-ACTIVATED ARCHWIRES

The Thermal-Activated NiTi Archwires provide optimal and consistent tooth moving forces. The thermal reactive properties, activated at 27°C, provide a greater flexibility and the application of consistent and light force.

Thermal-Activated Archwires are suitable to more severe deformations, gently moving teeth over greater distances.

Archwires packed and sealed in 5 units. May be autoclaved for additional protection.

I PREMOLAR BANDS

Premolar Bands are anchorage points for maxillary expansion procedures with Haas, Hyrax and Jones Jig devices and Nance buttons. These bands are also a solution for recurrent falling brackets, when the brackets are welded to the band.

The Premolar Bands present an anatomical shape, with round edges, for use on both left and right sides.

Quantity: 10 Units

I BIDIRECTIONAL BALL HOOK

Bidirectional Ball Hook easy to place onto any archwire as an auxiliary attachment to place elastics, springs, among others.

Quantity: 10 Units

Short	A11-78AA
Long	A11-79AA

I BUTTON WITH CHAIN

Button with Chain to move non erupted teeth up to the correct their correct position. The button is bonded to the tooth and the chain anchored on the arch or other orthodontic accessories enabling the tooth traction.

The traction chain moves freely in the eyelet for a greater comfort.

Type: Bondable | Color: Gold | Quantity: 2 Units

Round	BOTGLD02
Rectangular	BOTGLD01

I OPEN CRIMPABLE STOPS

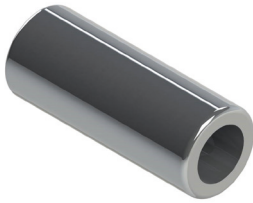

Crimpable Stops contain or limit archwires and orthodontic accessories from moving.
The Open Crimpable Stops can be inserted easily and perfectly onto the rectangular archwire without removing the wire.

Type: For Rectangular Archwires | Quantity: 10 Units

Rectangular

A10-77AA

I CLOSED CRIMPABLE STOPS

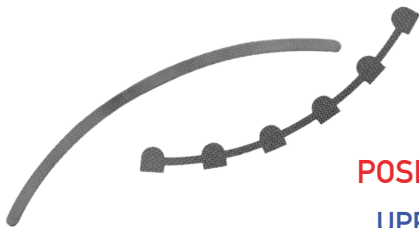

Closed Crimpable Stops contain or limit archwires and orthodontic accessories from moving.

The Crimpable Stops is easily attached to the archwire, just a simple squeeze with the pliers.

Type: For Round Archwires | Quantity: 10 Units

I LINGUAL RETAINERS

Lingual Retainers retain the teeth in position during the orthodontic treatment, preventing inadvertent tooth movement resultant from active force wires.

Quantity: 10 Units

I RETRACTION COIL SPRINGS WITH EYELETS

Coil Springs deliver light continuous force to move tooth efficiently with less patient trauma. The springs may be compressed or elongated without deformation, returning to their original shape as the teeth move.

Closed Retraction Springs will exert a continuous force to close dental spaces. The eyelets at each end will enable the spring easy anchorage on the hooks, cleats and tubes.

Quantity: 10 Units

6 mm x 0,12"	W6-M1206

I LIGATURE TIES 1040

Elastic Ligatures Ties are used to keep the archwire on the brackets, fixing it. Moreover the ligatures enable the correction of some types of malocclusions.

The Elastic Ties are individual preventing cross contamination, have an excellent shape memory, colour stability and are non-toxic.

Quantity: 1040 Ties | 40 Sticks (26 Ties per Stick)

I LIGATURE V TIES

Elastic Ligatures V-Ties with a 45° degree angle are easier to place on the bracket. Their better adaptation and elasticity will fix perfectly the archwire on the brackets.

The Elastic V Ties are individual preventing cross contamination, have an excellent shape memory and colour stability.

FASHION TIES

I FASHION TIES

Elastic Ligatures Ties with fun shapes, Mickey Mouse, Hello Kitty or flowers, to fix the archwire to the brackets.

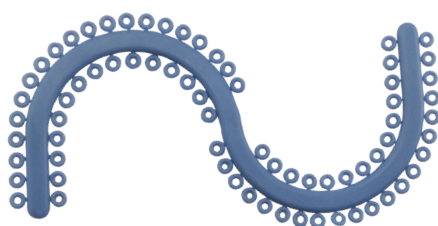

The Elastic Ties are individual preventing cross contamination, have an excellent shape memory, colour stability and are non-toxic.

Quantity: 1000 Ties | Assorted Colours

FLOWER	EL-FLOWER1000
HELLO KITTY	EL-KITTY1000
MICKEY MOUSE	EL-MICKEY500

SEPARATOR

I ELASTIC SEPARATORS

Modular Elastic Separators to open interproximal spaces before placing molar bands. The separators make a soft and continuous force comfortable for the patient.

S Shaped | Color: Blue | 1050 Units

1050 Units	ES-S01
------------	--------

ACCESSORIES

I ELASTIC PLACER

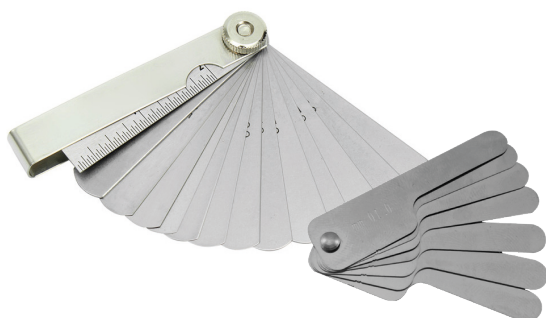

The Elastic Placer will enable an easy, quick and hygienic placing of intra-oral elastics by the patient. The placer has two extremities one to place the elastic and another one to remove it.

Assorted Colors | 20 Units

20 Units	POS-001

INTERPROXIMAL

I INTERPROXIMAL RULER

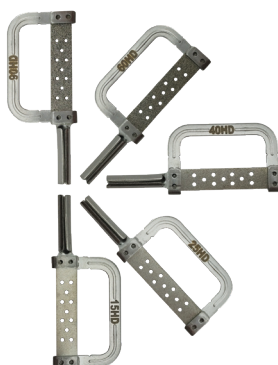

With the Interproximal Ruler verify with precision the Interproximal spaces.

6 Blades Model | 0.10, 0.15, 0.20, 0.25, 0.40 and 0.50 mm

12 Blades Model | 0.05, 0.10, 0.15, 0.20, 0.25, 0.30, 0.40, 0.50, 0.60, 0.70, 0.80, 0.90 and 1.00 mm

6 Blades	IPR-002
12 Blades	IPR-001

I ORTHO STRIPS

Diamond Ortho Strips for interproximal reduction, facilitating the opening, modelling and polishing of enamel or restorations.

The Strips are flexible and are coated on both sides enabling the polishing of two dental faces at the same time.

Autoclavable and Reusable | 1 Unit or 5 Units Kit

THICKNESS

15µm 0.05 mm	15HD
25µm 0.08 mm	25HD
40µm 0.14 mm	40HD
60µm 0.18 mm	60HD
90µm 0.24mm	90HD
Kit 15 - 90µm	KIT 15-90HD

I ORTHO STRIPS HANDLE

Handle for Diamond Ortho Strips, for manual interproximal reduction. The handle enables the position of the Ortho Strips in different angles.
